

Using gsLearn on a Mobile Device (Phone or Tablet)

Currently, gsLearn does not work automatically on mobile devices. GSUSA's platform relies on "third-party" cookies to validate user credentials. Browsers on mobile devices may be set to block third-party cookies from unvisited sites. If a desktop or laptop is not available for use, follow these steps to change the security settings on your device's browser in order to access gsLearn. Note: You may wish to change settings back after completing training.

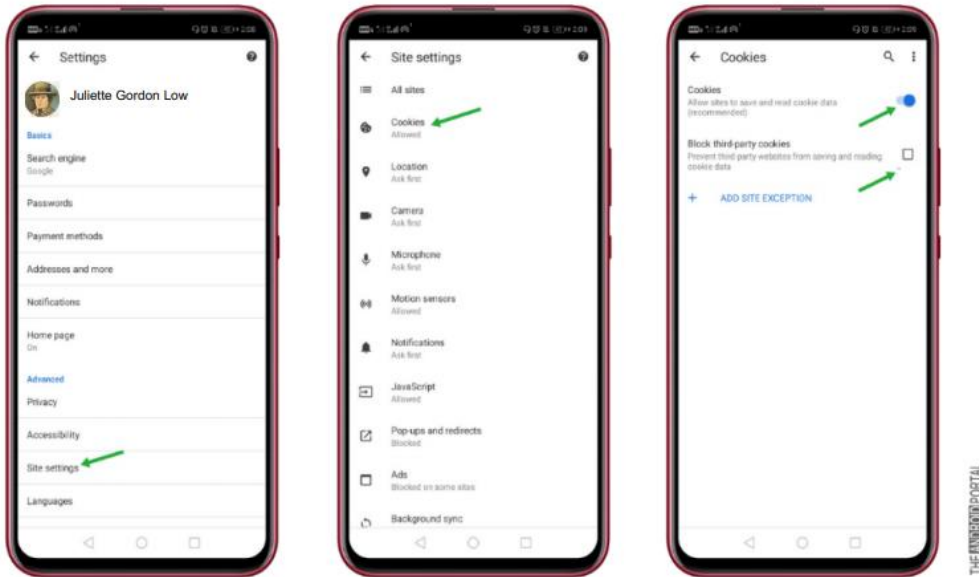

If you have an Apple iPhone or iPad with Safari

1. Go to Settings.
2. Scroll down and select Safari.
3. Move the toggle switch to disable **Prevent Cross Site Tracking**.
4. Move the toggle switch to disable **Block All Cookies**.

Android Mobile Phone and Tablet with Chrome

1. Open the Chrome app.
2. Select **More** (on the right side of the address bar).
3. Select **Settings**→**Site Settings**.
5. Select **Cookies**.
6. Move the toggle switch to the **off** position.
7. Uncheck **block third-party cookies**.

Other Devices and Browser Apps

Check the browser's support website guidance on disabling and blocking third-party cookies in the browser and device settings.
